EDUCATION

Arizona State University
Bachelor of Science in Computer Science
GPA: 4.00

Tempe, AZ
Expected 2026

WORK & LEADERSHIP EXPERIENCE

Amazon Web Services (AWS)

Boston, MA

Software Engineer Intern

May 2025 – Aug 2025

- Automated the manual validation process for the customer-facing UI of a \$1B annual revenue file storage service, reducing operator effort by 70% every validation cycle.
- Initiated the integration of GenAI into team documentation workflows, cutting developer effort by 40% for creating and maintaining code documentation.
- Collaborated with cross-functional teams to align validation and documentation improvements with product goals, ensuring smooth adoption and measurable efficiency gains.

DataAnnotation

Remote

Software Engineer, Contract

Mar 2024 – May 2025

- Provided training and guidance to various AI models, ensuring accuracy and adherence to best practices in coding languages, including Python, Java, C, C++, and SQL.
- Evaluated AI models to enhance programming performance and efficiency in multiple projects, contributing to streamlined development processes.
- Applied knowledge of AI methodologies and programming languages to support model improvements in accuracy, scalability, and overall effectiveness when prompted to write code.

PROJECTS

Full Stack JavaFX App

Java, JavaFX, SQL

Dec 2024

- Led a team of 5 developers to create a full-stack bookstore application, leveraging JavaFX for UI and SQL for data storage and manipulation.
- Developed a performant app that accomplished all predefined goals and exceeded all predefined performance metrics by 25%.
- Utilized GitHub for version management and Jira for team coordination and management.

Financial Market Sentiment Analysis

Python, Google Colab

Sep 2024

- Collaborated with two other developers to create a stock price analyzer in a Google Colab Python notebook.
- Developed a web scraping solution to extract articles relevant to selected stocks and queried them through an OpenAI LLM for sentiment analysis.
- Correlated the sentiment analysis results with historical stock price data to identify trends, providing insights into how market sentiment impacts stock movements.

SKILLS

Languages: English (Native), Spanish (Conversational)

Programming Languages: Java, C, C++, Python, R, Javascript, Typescript, HTML, CSS, SQL

Technologies: AWS Ecosystem, Git, VS Code, MongoDB, Linux, Node.js

Miscellaneous: Automotive Repair, Automotive Software
